

REMARKS

By this amendment, claims 1-12 are canceled claims 13-28 are added for the Examiner's consideration. The Examiner is respectfully requested to enter the foregoing amendment prior to examination of the above-identified patent application. Applicants respectfully submit that the foregoing amendment does not add new matter to the present application.

New claims 13-24 substantially correspond to original claims 1-12. The amendment herein is made to delete reference numerals in the claims and to better comport such claims to U.S. Patent practice. For example, claims 13-24 correct minor grammatical errors. The amendments to the claims have not been made to overcome the prior art, and thus, should be considered to have been made for a purpose unrelated to patentability, and no estoppel should be deemed to attach thereto. Additionally, new claims 25-28 are provided herein which recite additional features of the invention.

The specification is amended to include headings, and to delete "objects" of the invention, "means" language, and to correct minor grammatical errors. A substitute Abstract is also attached hereto. No new matter is added. Should there be any questions, the Examiner is invited to contact the undersigned at the below-listed telephone number.

Respectfully submitted,  
Darren KIDNEY
